

Industrial FLOOR TRUCKS

Series "B"

Associated Machinery Inc.'s industrial floor trucks are designed of hardwood construction, fitted with space age phenolic roller bearing wheels and ball bearing swivel casters for strength and durability. Associated's phenolic wheels resist shock without chipping. They are non sparking and non marking. They can be operated continuously -50 degrees to 260 degrees and intermittently to 300 degrees. They are unaffected by grease, oil, or most other chemicals and provide excellent floor protection for wood, concrete, and ceramic tile.

Our swivel casters are precision built with two perfectly aligned swivel raceways. All the cold form parts are made to exacting tolerances from heavy gauge steel and are hardened for severe service and long wear.

Series "C"
