

# POWERPRESS TRUSS TABLE

## BUILT FOR PRECISION & POWER

Take the guesswork out of jack truss assembly with our **PowerPress Truss Table**. Engineered for speed, strength, and simplicity, this machine delivers consistent, high-quality results every time. Our powerful hydraulic system presses plates firmly into place without the need for additional pressing.

With user-friendly controls and built-in safety features, your crew can work efficiently and confidently. When an increase in production, quality, and safety are paramount, this is the machine your business needs to get the work done right the first time. Built tough for daily use and designed to grow with your operation, the PowerPress Truss Table is a smart investment in quality and productivity.

## FEATURES

1. **Designed Specifically for Jack and Box Trusses.** This method ensures tight, consistent joint alignment. Can also be used for regular trusses up the 72" peak height.
2. **A Powerful and Flexible Press:** High pressing force in a smaller machine saves valuable shop space while maintaining production muscle.
3. **Speed Up Production:** Cycle times are optimized for fast, repeatable pressing – cutting labor time and boosting output.
4. **Reduced Operator Fatigue:** Ergonomic controls provide positive plate embedment and reduces manual effort and improves operator comfort.
5. **Integrated Safety Features:** Sensitive electric eyes provide emergency stop functions that keep the crew and operator protected.
6. **Built for Durability:** Heavy-duty steel frame and precision hydraulic components stand up to daily wear in demanding shops.
7. **Versatile Setup:** Adjustable table and clamping options handle a wide range of jack truss designs and sizes.
8. **Easy Maintenance Access:** Simplified design with fewer moving parts and clear access points keeps downtime to a minimum.
9. **Compatible with most plates** from 20g to Advanced High strength connectors without retooling.
10. **Easily Extended:** A 20' jack table can be extended with the addition of a 10' or 20' table section – and there's no down time while the parts are being installed.
11. **ROI in Mind:** Designed to improve quality and consistency – cutting rework and waste for a faster return on investment.
